ON DRAW BAR MAST; \$260.00 FULLY INSTALLED  
PHOTO 1

2. OMNI WHIP MT  
PHOTO 2

\$195 (ONE HR INSTALL) – \$245 (TWO HR INSTALL)

This antennae works very well and requires no setup, it is non directional, it has built in amplifier requiring 12V DC. Usual pick up range is 50 klm from the transmit site – depending on location variables –refer to the website for further details

3. HAPPY WANDERER;  
PHOTO 3

RRP: \$180

**If it can be said that a caravan antenna will work anywhere in Australia – this is it.** It is the only antenna capable of meeting the requirements of all for modes of DTV transmission – as explained in the website. There are several installation options for this antenna;

- The draw bar mount – as per item 1
- A masting kit that attaches to the caravan side – the advantage of this method is that the kit remains attached to the caravan which means that storage space for the system is not required.
